Dawson Ash

Boulder, CO | (970) 518-6326 | dawsonash22@gmail.com | github.com/dawsonash

Education

University of Colorado, Boulder **Graduation: Spring 2028**

Bachelor of Science in Computer Science

Relevant Coursework:

- Software Development Methods & Tools: Full-stack development, Agile methodology, Git version control, and collaborative team workflows.
- Computer Systems: Unix/Linux environments, shell scripting, and hands-on systems administration.
- Linear Algebra: Matrix operations, and eigenvalues/eigenvectors, foundational machine learning algorithms.

Professional Experience

Sofware Engineer Intern **May 2026 – Present**

Digital Accessibility Office, University of Colorado Boulder

- Built a TUI to streamline the student audio captioning workflow.
- Revamped the existing workflow, using WhisperX and AWS SageMaker, and designed a new user interface for the internal tool.

UX/UI Developer Intern **Feb 2025 – May 2025**

NOAA

- Collaborated with scientists and engineers in an Agile team, communicating design decisions and progress updates during regular sprint reviews.
- Integrated REST APIs connecting front-end components to back-end data services; managed work in Git and coordinated with both local and remote team members.

Robot Field Operator **July 2026 – Present**

Pattern Labs

- Deploy and operate autonomous robotic systems at Denver International Airport, monitoring real-time performance and delivering structured technical feedback to the engineering team.
- Serve as the on-site interface between customers and engineers, communicating clearly to surface issues and ensure smooth operations in an unstructured, fast-paced environment.

Projects

Function Finder – Live Site **2026**

- Led architecture and front-end development of a full-stack social event web app, taking the project from Figma prototype through to production deployment.
- Demonstrated ability to own a technical project end-to-end, making independent decisions under time constraints while coordinating with a 4-person team.

Professional Development

Nvidia Fundamentals of Deep Learning Certification **December 2025**

- Built and trained a convolutional neural network in PyTorch, gaining hands-on exposure to the machine learning foundations behind modern autonomous systems.

Google UX Design Professional Certificate **December 2024**

- Completed end-to-end UX curriculum; practiced translating user feedback into clear, actionable improvements directly applicable to providing quality field feedback.

Skills

- **Technical:** Python, JavaScript, SQL, Git, Unix/Linux, REST APIs, web development.
- **Operations:** Customer-facing service, fast-paced environment, independent work, structured feedback reporting.
- **Other:** Strong written and verbal communication, attention to detail, quick learner, Agile/Scrum team experience.
